

HACKATHON PITCH | JULY 28, 2026

LEVEL 1 PROTOTYPE / STAGE-READABLE PRODUCT SHOWCASE

SUNNY

One tap from a child. One calm signal for a teacher.

Notice change early — without diagnosing, ranking, or guessing.

Join our classroom — right now, on your phone

1. Scan the QR code 2. Tap “I’m a student” 3. Class code ROOM6 4. Type your first name

It takes twenty seconds. You'll see why in three minutes.

26 students. One teacher. Six hours.

SUNNY PITCH / STAGE 1 PROTOTYPE

26:1

RATIO

The children who most need noticing are often the hardest to see.

Masking

No words yet

Won't say it aloud

By the time a struggling child is obvious, they may have been struggling for weeks.

How do you know the child is sad?

SUNNY PITCH / STAGE 1 PROTOTYPE

We don't.

"Sunny doesn't diagnose children, it simply helps teachers notice meaningful changes and start supportive conversations."

*Supported by Movember (2023) and
Brink et al. (2011)*

WHAT SUNNY DETECTS

A number a child chose for themselves moved away from their own normal.

WHAT SUNNY IGNORES

Nothing about feelings.

Nothing about why.

No clinical labels. No diagnoses. No ranking.

Detection is **arithmetic**. Interpretation is **human**.

One tap. One calm dashboard.

SUNNY PITCH / STAGE 1 PROTOTYPE

Student Check-in

Great

Good

Okay

Not Good

Struggling

- ✓ **Five visual choices** for rapid, wordless expression.
- ✓ Optional reason tags including **"Rather not say."**
- ♥ Private view: children see **only their own** history.

R1 SIGNAL

B

Ben

Checked in today

QUIET

- 🎯 **Class at a glance:** Soft, non-clinical signal indicators.
- 🎯 **Personalized:** Each child compared only to themselves.
- 🎯 **Explainable:** One click to see the arithmetic "why."

Built to work in the room, not just in a demo.

SUNNY PITCH / STAGE 1 PROTOTYPE

PHASE 01

Student Entry

A simple, fast path designed for classroom flow. One tap, no friction.

- ✓ Secure Class Code entry
- ✓ Five-choice visual check-in
- ✓ Optional "Rather not say" tag

PHASE 02

Live Dashboard

Data reaches the teacher instantly. High visibility with low cognitive load.

- ✓ Real-time check-in sync
- ✓ Soft, explainable signals
- ✓ Class-at-a-glance status

PHASE 03

Human Decision

The teacher inspects the arithmetic and decides how to respond.

- ✓ Audit arithmetic logic
- ✓ Note, Mute, or Dismiss
- ✓ Manual escalation preview

PRODUCT INTEGRITY
PROOF

Separate User Surfaces

No Free-Text or Tracking

Optional Live Demo Mode

Audit-Ready Calculations

Detection is arithmetic. AI only writes the wording.

SUNNY PITCH / STAGE 1 PROTOTYPE

Remove the AI entirely and Sunny flags exactly the same children.

Transparency by design: The logic is math, the interface is human.

Four rules a parent can check by hand.

SUNNY PITCH / STAGE 1 PROTOTYPE

R1

Sudden change

At least 2 steps below the child's own 30-day median for 2 or more consecutive days.

R2

Sustained drift

At least 1.5 steps below their own median for 3 or more consecutive days.

R3

Repeating cycle

The same weekday is at least 1.5 steps below their own median in 4 or more of the last 6 occurrences.

R4

Stopped checking in

A child who normally checks in misses 3 or more consecutive school days.

R5

May not be reading

Same slot tapped in 4 of the last 5 check-ins, producing 3+ different scores.

Every rule compares a child only with themselves — never with the class.

A signal opens a conversation. It never makes a decision.

DETERMINISTIC LOGIC REVIEW

30-Day Median Baseline: 4.2

Latest Check-in (2 Days): 2.0

Variance: -2.2 (Triggered)

Human-Written Support Plan

"Check in with Cody during morning break. Focus on peer interaction. He was quiet in group work yesterday."

AI Wording Suggestion (Optional)

"Cody's self-reported mood has dropped significantly below his normal range for two consecutive days."

Teacher Control Center

 Add Note

 Mute Signal

 Dismiss

Manual Escalation Preview

DRAFT FOR WELLBEING LEAD

"I am noticing a shift in Cody's baseline. He has reported low numbers twice this week. I will monitor his interaction at lunch."

 The teacher reviews exactly what will be shared and writes the consequential note themselves before any contact is made.

Every consequential action remains a human decision.

A working Level 1 prototype — ready for a pilot.

SUNNY PITCH / STAGE 1 PROTOTYPE

Built Now

- ✓ **Separate User Surfaces:** Distinct flows for students and teachers.
- ✓ **Full Logic Engine:** All 4 arithmetic rules and transparent calculations.
- ✓ **Control UI:** Support plans and manual escalation preview.
- ✓ **Demo Mode:** Optional live/shared mode for presentation.

Limitations

- ❗ **Simulated Data:** All infrastructure is currently browser-based.
- ❗ **Illustrative Auth:** Mock login system is not production secure.
- ❗ **Non-Clinical:** No diagnostic role or clinical certification.
- ❗ **Level 1 Status:** Functional proof-of-concept, not a finished app.

Next Step

- **One School Pilot:** Testing usability across one full term.
- **Secure Scaling:** Production storage and teacher accounts.
- **Measurement:** Tracking follow-through and false positives.
- **Ethics Review:** Formal consent and safeguarding audits.

⚠ *Detection remains strictly rule-based throughout the roadmap. AI wording remains optional and human-verified.*

Sunny didn't diagnose Cody.

SUNNY PITCH / STAGE 1 PROTOTYPE

It showed its working — and made sure a caring adult noticed.

A calm signal for every teacher. A voice for every child.

PILOT ASK

Help us test one class, for one term, with safeguards designed in from day one.

"The only intelligence Sunny should add is the kind that helps a human notice."
